

JAY PRAJAPATI

Backend Developer

Mehsana, Gujarat • +91 7016455240 • jayp232388@gmail.com
LinkedIn: [linkedin.com/in/jay-prajapati-760177311](https://www.linkedin.com/in/jay-prajapati-760177311) • GitHub: github.com/JAY-822005

PROFESSIONAL SUMMARY

Backend Engineer specializing in the Python/Django ecosystem with a focus on building scalable, high-concurrency applications. Experienced in designing RESTful architectures, managing complex database relationships, and implementing CI/CD workflows. Long-term focus on SRE/DevOps to optimize large-scale cloud infrastructure.

TECHNICAL SKILLS

Languages: Python (Advanced), SQL (PostgreSQL, MySQL), Bash Scripting

Frameworks: Django, Django REST Framework (DRF), FastAPI, Celery

Databases & Caching: PostgreSQL, Redis (Caching/Task Queues), MongoDB

DevOps & Tools: Docker, Docker-Compose, Git/GitHub, Nginx, Linux (Ubuntu), GitHub Actions (CI/CD)

Backend Mastery: System Design, JWT/OAuth2, Database Normalization, Microservices, PyTest

PROFESSIONAL EXPERIENCE

Backend Developer Intern

Jan 2026 – July 2026 (Expected)

Elevance Skills Tech

- Developing enterprise-grade server-side logic using Django and PostgreSQL, focusing on modularity and high-availability.
- Optimized movie-booking engine (BookMyShow Clone) by implementing atomic seat-selection logic and transaction handling to prevent overbooking.
- Designed and refined DRF endpoints, reducing frontend-to-backend latency via efficient serialization and caching strategies.
- Utilize Git and Agile methodologies for version control and collaborative sprint-based development cycles.

TECHNICAL PROJECTS

SaaS Subscription & Billing Engine

Django, Stripe API, PostgreSQL, Docker

- Built a multi-tier subscription system for recurring billing, plan upgrades, and automated invoice generation.
- Integrated Stripe API with Webhooks to synchronize local database states with real-time payment events.
- Developed custom Middleware to manage feature-gate access levels based on user subscription status.

Distributed Job Portal Backend

Python, DRF, PostgreSQL, Redis

- Architected a multi-role platform (Recruiters & Candidates) with complex search and filtering capabilities.
- Integrated Celery & Redis for asynchronous tasks, including bulk application status emails and resume processing.
- Optimized database schemas using MVT architecture and custom managers for high-speed query execution.

Movie Ticketing System (Clone)

Django, MySQL, DRF, JWT

- Engineered theater-management backend supporting multiple screens, showtimes, and dynamic pricing models.
- Implemented JWT Authentication and fine-grained permissions to distinguish between admin managers and users.

EDUCATION

Bachelor of Technology in Information Technology

2022 – 2026

Sankalchand Patel College of Engineering (SPCE)

Gujarat, India
